

HACK FOR HUMANITY *Miami*

ONE DAY. FOUR CHALLENGES. ONE CITY.

The Hack for Humanity: Miami challenges are live.
On Saturday, Oct 10, we're building what Miami needs next:

01 
Four Forces, One City
water, air, land, fire

02 
Wild Miami
animal welfare
and protection

03 
Brain Gain
keeping Miami's
talent in Miami

04 
Data to Action
turning open data
into decisions

// WHY WE'RE HERE

Every challenge today is a real Miami problem.

They come from the conversations our community had during Humans in AI Week this summer. Today we build the answers.

THE GOAL: BENEFIT HUMANITY. WHAT COULD BE MORE HUMAN?

// HACK FOR HUMANITY, WORLDWIDE

One global movement, built city by city

120

AI Collective chapters
hacking for humanity this fall

50

countries, from Miami to São
Paulo to Noida

3

global themes: job
displacement, technical
literacy and accessibility

// BROUGHT TO YOU BY

Four partners, one builder community

PRESENTER

The AI Collective

Global nonprofit uniting 450k+ AI pioneers

PARTNER

Major League Hacking

Brings Hacktoberfest and the open-source AI prize

HOST + VENUE

The LAB Miami

Our home base in Wynwood for the day

CO-HOST

DeepStation

Co-host of Miami's AI hackathons

// THE DAY • SAT, OCT 10

5 hours to build

10:00 AM **Check-in**
OrganizerHQ at the desk, swag, team matching

10:30 AM **Welcome + Team Formations**
Challenge briefing and MLH intro

11:00 AM **Build time starts**
Teams lock

1:00 PM **Lunch + Stretch**

4:00 PM **Shortlisting Starts**
Submit in OrganizerHQ + Demo Selections

4:30 PM **Submissions close**
Demos begin: 2 minutes + 1 minute of Q&A

5:00 PM **Judging**
Judges tally the scores

5:15 PM **Winners and closing**
Prizes, photos, thank-yous

Open-source AI gets its own prize

Miami is an official MLH Hacktoberfest Hack Day. Build with open-source or open-weight AI to compete for one more prize.

★ **A DEV Badge for every team member, plus
MLH+DEV swag**

TO QUALIFY

- ✓ Open-source or open-weight AI is a core part of the project
- ✓ Public GitHub repo with an open-source license
- ✓ Model named and license linked in your README

Agent skills follow the Agent Skills standard at agentskills.io

BUILD WITH GEMMA 4

Google supports Major League Hacking and the Hack Days program with AI tools for experimentation and rapid prototyping. This category gives hackers a chance to build with Gemma, Google's family of lightweight, open models.

★ GEMMA 4 PARTNER PRIZE

TO QUALIFY

- ✓ USE OF GEMMA 4 MODEL

Four challenges. Pick one.

01 Four Forces, One City

How does Miami stay safe and livable as water, air, land and fire push back?

02 Wild Miami

How do we protect the animals we share Miami with, and keep neighbors safe too?

03 Brain Gain

How does Miami keep the talent it attracts?

04 Data to Action

What does the data say, and what should Miami do about it?

Four Forces, One City

How does Miami stay safe and livable as water, air, land and fire push back?

Water

- King tides, rising seas
- Street and home flooding
- Canal and bay water quality

BUILD IDEA

Street-level flood alerts from tide and rain data

Air

- Hurricane readiness
- Air quality
- Networks down in storms

BUILD IDEA

An offline-first info hub for storm days

Land

- Housing, homelessness
- Access to aid programs
- Food access, traffic

BUILD IDEA

A benefits navigator for families

Fire

- Extreme heat, cooling
- Outdoor worker safety
- Climate risk, insurance

BUILD IDEA

Heat-risk alerts for construction crews

Wild Miami

How do we protect the animals we share Miami with, and keep neighbors safe too?

THE TEST

Is an animal safer because your tool exists?

Route people to professionals. Never encourage anyone to chase or handle wild animals.

CHALLENGES TO EXPLORE

Urban wildlife and invasive species

A photo-to-species agent: what it is, whether it's dangerous, who to call

Roadkill

Hotspot maps that recommend crossings and speed changes

Everglades and endangered species

Sighting and injury reports routed to the right rescue group

Rescue and shelters

Lost-and-found matching, foster networks, hurricane pet evacuation

Cruelty and neglect

Fast, anonymous reporting with location, photos and urgency

Brain Gain

Miami is a magnet for talent. How does it keep the talent it attracts?

THE TEST

Would one specific person choose to stay because of it?

Design for one person: a graduating senior, a hospitality worker, a relocated engineer.

CHALLENGES TO EXPLORE

Graduates leaving after school

A career pathway navigator from skills to Miami employers and mentors

AI reshaping jobs

A reskilling coach that maps transferable skills to growing roles

Cost of living

An affordability planner: salary, rent, commute and flood risk by neighborhood

Newcomers without a network

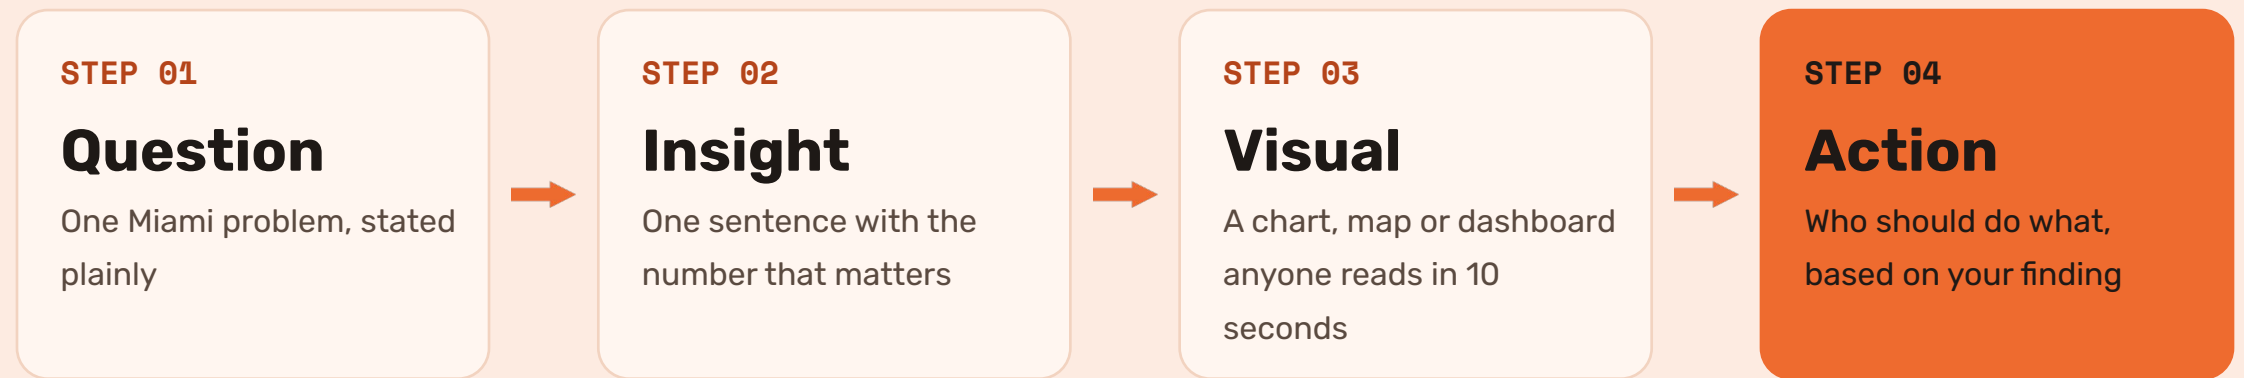

An onboarding guide to Miami's communities, meetups and mentors

Access for everyone

Career tools built for every language, ability and background

Data to Action

What does the data say, and what should Miami do about it? No full app required.

RECOMMENDED STACK (OPTIONAL)

Put your data sources and code in the repo so judges can reproduce your result.

// RULE #1 FOR EVERY TEAM

Start from a person, not a technology.

“Construction crews in Brickell on a heat-advisory day” beats “a heat app.”

Name who you're building for in your README, and say it in the first 10 seconds of your demo.

Build it today. Ship it in public.

Teams

- Solo to 4 people
- Team formations in the lounge
- Teams lock at 11:00 AM

Built today

- Ideas and research: yes
- Libraries and APIs: yes
- Any AI tools: yes
- Pre-written code: no

Submission

- Public GitHub repo
- Live Demo Links
- Video(in case)

All project work happens during build time, per the MLH Standard Hackathon Rules. List every AI tool you used in your README.

// SUBMISSION

Shortlisting starts at 4:00 PM

- ✓ Checked in through OrganizerHQ at the door
- ✓ Project name and a short description
- ✓ Public GitHub repo with an open-source license
- ✓ Technologies used, including AI models
- ✓ Challenge track selected
- ✓ README: track, data sources, models, how to run, team
- ✓ Demo URL or video (optional)

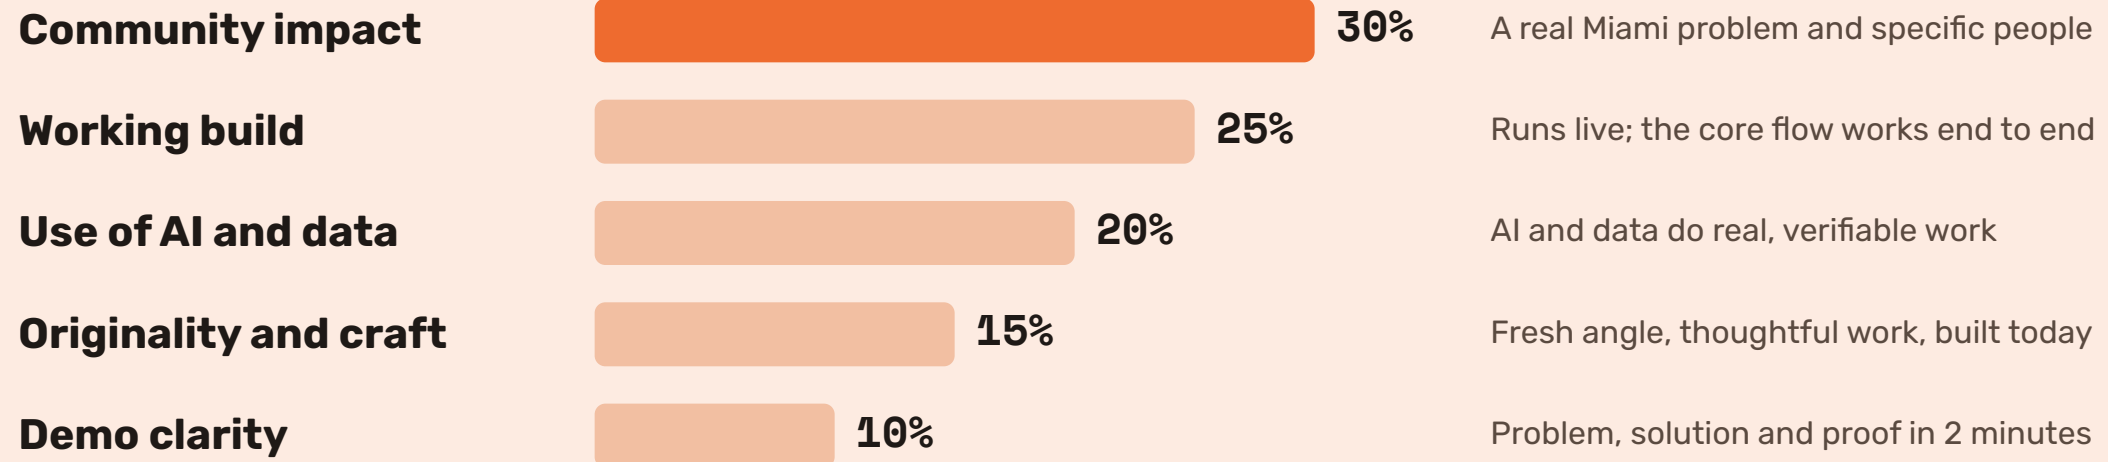

DEADLINE

4:30

PM • SAT, OCT 10

Submit early, then rehearse
your 2-minute demo. One
submission per team.

Community impact carries the most weight

Each criterion is scored 1-10.

Grand Champion = Top weighted score overall;

Partner Challenge = Top weighted score with use of that partner;

// PRIZES

Who wins what

☆ BUILD FOR MIAMI

THEME CHAMPION

👤 Best Use of Gemma 4

AI WINNER

</> MLH BEST OPEN-SOURCE AI PROJECT

OPENSOURCE WINNER

- ARDUINO BOARDS
- TSHIRTS
- SWAG BAG

All winners may be invited to join a grant-funded project to commercialize what they built, and showcased in The AI Collective's global newsletter to 450k+ subscribers.

Bring your stack. Start with these.

AI tools

- Gemma 4 on the Gemini API
- Snowflake CoCo (free trial)
- Hugging Face and Ollama
- Agent Skills standard

City and climate

- Miami-Dade County Open Data Hub
- City of Miami Data Explorer
- NOAA Tides & Currents
- National Hurricane Center
- OpenFEMA and AirNow

People and wildlife

- U.S. Census data
- BLS jobs and wages
- O*NET career paths
- iNaturalist and GBIF

Every link is in your Challenge Guide. Bring your own data too, and cite it in your README.

// GOOD TO KNOW

Everything you need for today

Check in

Scan the OrganizerHQ code at the desk.
Required to submit and win.

Wi-Fi

Network: The Lab miami
Password:

Food + Stretch

Out from 12:30 to 2:00 PM. Eat when it suits your team.

Find a team

Team-matching board in the lounge until
11:00 AM

Need help?

Find any organizer, any time. We're here
all day.

Code of Conduct

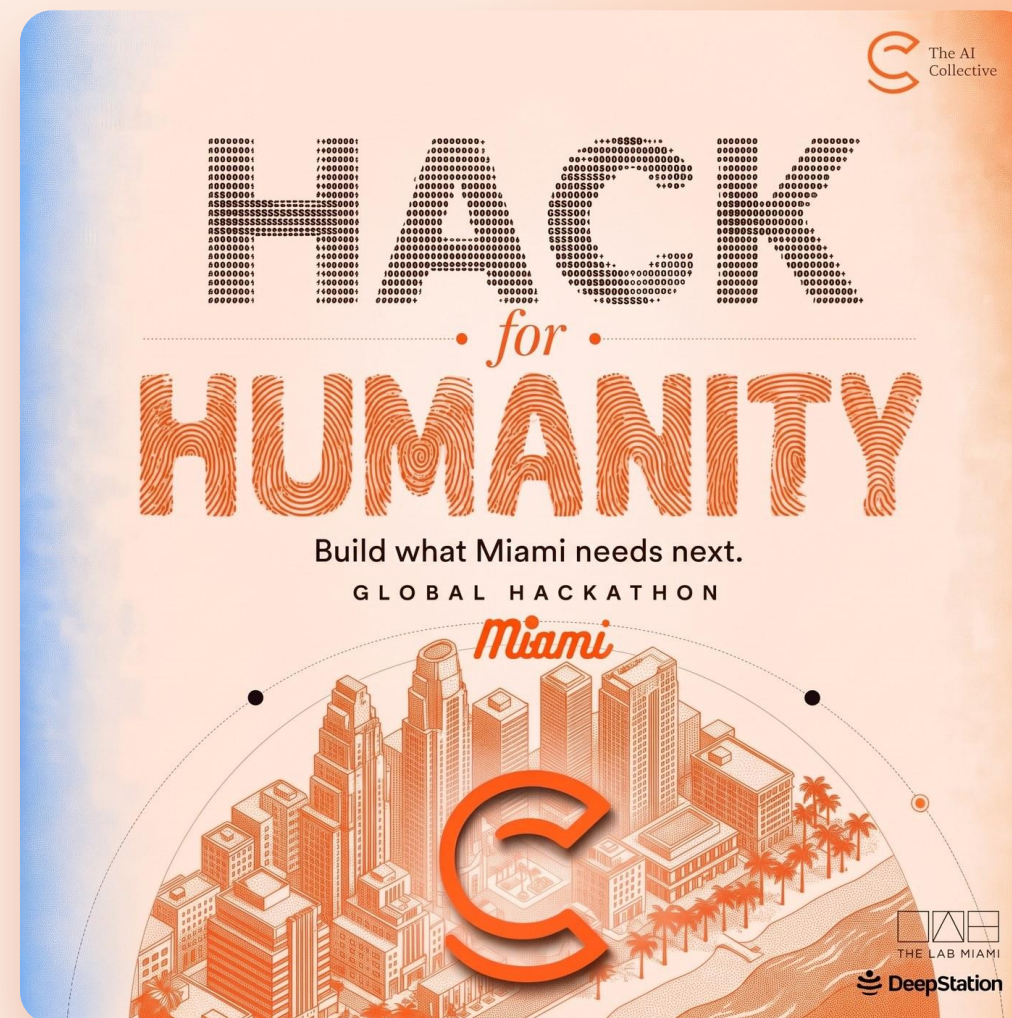

The MLH Code of Conduct applies all day,
everywhere in the venue.

// BUILD TIME STARTS AT 11:00 AM

Go build what Miami needs next.

SUBMISSIONS CLOSE 4:30 PM
